Introducing you the Eldicare 2.0 project!

ABOUT THE PROJECT

Eldicare 2.0 builds on the success of the "Eldicare: Matching Skills in a Growing European Silver Economy" project, which significantly impacted the elderly care sector. However, the COVID-19 pandemic disrupted both the project's activities and highlighted gaps in the sector's readiness to handle such crises.

This new initiative addresses post-pandemic challenges by focusing on digitalization, green transitions, and enhancing the entrepreneurial and soft skills of caregivers, aligning with EU goals. With over 20% of the EU population aged 65 or older in 2021, the demand for high-quality, accessible long-term care is increasing. Eldicare 2.0 seeks to equip the sector to meet these needs in a resilient, sustainable way.

PROJECT KICK-OFF MEETING IN ATHENS, GREECE

The project's Kick-off meeting brought together partners to discuss goals, timelines, and collaboration strategies. This event laid the groundwork for achieving Eldicare 2.0's objectives, emphasizing the role of VET and cross-sectoral cooperation in transforming the elderly care landscape.
