Résidence les Noisetiers

A nursing home combining new technologies for autonomy and an intergenerational dimension for the well-being of residents

1. Few words about Les Noisetiers

The site brings together 3 services managed by the Vyv Group in Angers:

Nursing home
(EHPAD)
« Les Noisetiers »
90 residents

Maternal Center
(child protection)
« L'îlot des
Familles »
20 lodging

Tiny nursery
« Les Lucioles »
10 places

The choice of the Vyv was to bring together these three independent entities, located in distinct areas of activity, on the same site, in particular in order to decompartmentalize the services and take the opportunity to implement the rapprochement between the generations.

90 lodging in the nursing Home

- 6 lodging for couples
- Suitable space
- Medical ceiling rails

Les Noisetiers integrates the most recent technological innovations in the field of home automation and connected objects in order to create a soothing, adapted and individualized environment:

- The room becomes a benevolent environment with technology completely transparent for the resident. The goal is to improve their quality of life and maintain their independence.
- For professionals, home automation provides an answer in terms of supporting their daily lives : a technology that supports human intervention and not replaces it. The objective is also to improve the quality of life at work for professionals.
- A caring, controlled and evolving environment.

2. Nursing Home's place in the continuum of services and support

The Nursing home is a solution which has existed in its current form for about 20 years in France. These establishments tend to evolve over the past 5 to 10 years towards supporting an extremely dependent public.

The EHPAD benefits from an organization and professionals allowing it to implement geriatric expertise guaranteeing quality support for dependent elderly people. The increasing prevalence of neuro-evolutionary diseases (Alzheimer's type) requires these establishments to renew themselves and adapt to the specific needs of the people concerned.
