

OLDER-EU / Visit Square des âges

Intermediate habitat

1. Few words about Square des Ages

Welcome to the Square des Ages: accommodation to live your retirement at home, independent, surrounded and reassured!

The Square des Ages is an innovative project, bringing together a set of 36 adapted apartments ranging from T1bis (32m²) to T3 (60m²) around common areas, located in the heart of a green district of Angers, Lac de Maine. The accommodations are distributed around a tree-lined urban garden.

The Square des Ages offers people aged 60 and over autonomy, security, conviviality and comfort thanks to :

- modern accommodation, designed to make everyday life easier and to adapt to people's needs, located in the heart of the city, close to shops, services (possibility of an internal shuttle) and public transport
- the presence of a support professional providing tenants who so wish with advice and support: regular visits, administrative procedures, coordination of home workers, etc.
- the provision of friendly places, leisure facilities and services, and the proposal of meeting times.

2. Square des Ages 'place in the continuum of services and support

In France, the accompaniment of the elderly has known in recent years a political and operational orientation which tends towards home care.

This political will responds to the majority wish of the French to age at home, in a familiar environment. Many systems are therefore organized around this new paradigm. However, given the issues of high level of dependency, social isolation, etc. not all elderly people can stay at home.

It is within the framework of the service and support continuum that VYV3 sets up a set of establishments and services adapted to the support of the elderly.

The Square des Ages is a step between the home and the retirement home. This place of life allows people to stay at home without being socially isolated and with easy access to various home services.
